|---|-----------|
| <b>Preface</b>  | <b>xi</b> |
| <b>Chapter 1 Foundational Material</b>  | <b>1</b>  |
| 1.1 Vector Space .....  | 1         |
| 1.1.1 The General Linear Group .....  | 1         |
| 1.1.2 Vectors and Tensors .....   | 3         |
| 1.2 Differentiable Manifolds .....  | 5         |
| 1.2.1 The Tangent Space, the Frame Bundle, and<br>Tensor Fields .....   | 5         |
| 1.2.2 Mappings of Differentiable Manifolds .....  | 7         |
| 1.2.3 Exterior Algebra, Pfaffian Forms, and the<br>Cartan Lemma .....   | 9         |
| 1.2.4 The Structure Equations of the<br>General Linear Group .....  | 12        |
| 1.2.5 The Frobenius Theorem .....   | 12        |
| 1.2.6 The Cartan Test .....   | 13        |
| 1.2.7 The Structure Equations of a Differentiable Manifold  | 15        |
| 1.2.8 Affine Connections on a Differentiable Manifold .....   | 18        |
| 1.3 Projective Space .....  | 19        |
| 1.3.1 Projective Transformations, Projective Frames, and<br>the Structure Equations of a Projective Space ..... | 19        |
| 1.3.2 The Duality Principle .....   | 22        |
| 1.3.3 Projectivization .....  | 24        |
| 1.3.4 Classical Homogeneous Spaces (Affine, Euclidean,<br>Non-Euclidean) and Their Transformations .....        | 25        |
| 1.4 Specializations of Moving Frames .....  | 28        |
| 1.4.1 The First Specialization .....  | 28        |
| 1.4.2 Power Series Expansion of an Equation of a Curve ...  | 30        |
| 1.4.3 The Osculating Conic to a Curve .....   | 32        |
| 1.4.4 The Second and Third Specializations and Their<br>Geometric Meaning .....                                 | 33        |
| 1.4.5 The Osculating Cubic to a Curve .....   | 35        |

|  |           |
|--|-----------|
| 1.4.6 Two More Specializations and Their Geometric Meaning .....   | 37        |
| 1.4.7 Conclusions .....  | 39        |
| <b>1.5 Some Algebraic Manifolds .....</b>  | <b>41</b> |
| 1.5.1 Grassmannians .....  | 41        |
| 1.5.2 Determinant Submanifolds .....   | 44        |
| Notes .....  | 46        |
| <b>Chapter 2 Varieties in Projective Spaces and Their Gauss Maps</b>   | <b>49</b> |
| 2.1 Varieties in a Projective Space .....  | 49        |
| 2.1.1 Equations of a Variety .....   | 49        |
| 2.1.2 The Bundle of First-Order Frames Associated with a Variety .....   | 51        |
| 2.1.3 The Prolongation of Basic Equations .....  | 53        |
| 2.2 The Second Fundamental Tensor and the Second Fundamental Form .....  | 54        |
| 2.2.1 The Second Fundamental Tensor, the Second Fundamental Form, and the Osculating Subspace of a Variety ..... | 54        |
| 2.2.2 Further Specialization of Moving Frames and Reduced Normal Subspaces .....                                 | 56        |
| 2.2.3 Asymptotic Lines and Asymptotic Cone .....   | 58        |
| 2.2.4 The Osculating Subspace, the Second Fundamental Form, and the Asymptotic Cone of the Grassmannian .....    | 59        |
| 2.2.5 Varieties with One-Dimensional Normal Subspaces ...  | 61        |
| 2.3 Rank and Defect of Varieties with Degenerate Gauss Maps .....  | 63        |
| 2.4 Examples of Varieties with Degenerate Gauss Maps .....   | 65        |
| 2.5 Application of the Duality Principle .....   | 70        |
| 2.5.1 Dual Variety .....   | 70        |
| 2.5.2 The Main Theorem .....   | 72        |
| 2.5.3 Cubic Symmetroid .....   | 76        |
| 2.5.4 Singular Points of the Cubic Symmetroid .....  | 78        |
| 2.5.5 Correlative Transformations .....  | 80        |
| 2.6 Hypersurface with a Degenerate Gauss Map Associated with a Veronese Variety .....                            | 81        |
| 2.6.1 Veronese Varieties and Varieties with Degenerate Gauss Maps .....  | 81        |
| 2.6.2 Singular Points .....  | 85        |
| Notes .....  | 86        |

|  |            |
|--|------------|
| <b>Chapter 3 Basic Equations of Varieties with Degenerate Gauss Maps</b>   | <b>91</b>  |
| 3.1 The Monge–Ampère Foliation .....   | 91         |
| 3.1.1 The Monge–Ampère Foliation Associated with a Variety with a Degenerate Gauss Map .....                           | 91         |
| 3.1.2 Basic Equations of Varieties with Degenerate Gauss Maps .....  | 92         |
| 3.1.3 The Structure of Leaves of the Monge–Ampère Foliation .....  | 95         |
| 3.1.4 The Generalized Griffiths–Harris Theorem .....   | 96         |
| 3.2 Focal Images .....   | 99         |
| 3.2.1 The Focus Hypersurfaces .....  | 99         |
| 3.2.2 The Focus Hypercones .....   | 101        |
| 3.2.3 Examples .....   | 102        |
| 3.2.4 The Case $n = 2$ .....   | 103        |
| 3.2.5 The Case $n = 3$ .....   | 104        |
| 3.3 Some Algebraic Hypersurfaces with Degenerate Gauss Maps in $P^4$ .....   | 105        |
| 3.4 The Sacksteder–Bourgain Hypersurface .....   | 116        |
| 3.4.1 The Sacksteder Hypersurface .....  | 116        |
| 3.4.2 The Bourgain Hypersurface .....  | 118        |
| 3.4.3 Local Equivalence of Sacksteder’s and Bourgain’s Hypersurfaces .....   | 123        |
| 3.4.4 Computation of the Matrices $C_i$ and $B^\alpha$ for Sacksteder–Bourgain Hypersurfaces .....                     | 125        |
| 3.5 Complete Varieties with Degenerate Gauss Maps in Real Projective and Non-Euclidean Spaces .....                    | 126        |
| 3.5.1 Parabolic Varieties .....  | 126        |
| 3.5.2 Examples .....   | 128        |
| Notes .....  | 132        |
| <b>Chapter 4 Main Structure Theorems</b>   | <b>135</b> |
| 4.1 Torsal Varieties .....   | 135        |
| 4.2 Hypersurfaces with Degenerate Gauss Maps .....   | 141        |
| 4.2.1 Sufficient Condition for a Variety with a Degenerate Gauss Map to be a Hypersurface in a Subspace of $P^N$ ..... | 141        |
| 4.2.2 Focal Images of a Hypersurface with a Degenerate Gauss Map .....   | 144        |
| 4.2.3 Examples of Hypersurfaces with Degenerate Gauss Maps .....   | 145        |

|     |   |     |
|-----|---|-----|
| 4.3 | Cones and Affine Analogue of the Hartman–Nirenberg<br>Cylinder Theorem .....  | 146 |
|     | 4.3.1 Structure of Focus Hypersurfaces of Cones .....   | 146 |
|     | 4.3.2 Affine Analogue of the Hartman–Nirenberg<br>Cylinder Theorem .....  | 149 |
| 4.4 | Varieties with Degenerate Gauss Maps with Multiple Foci<br>and Twisted Cones .....  | 151 |
|     | 4.4.1 Basic Equations of a Hypersurface of Rank $r$<br>with $r$ -Multiple Focus Hyperplanes .....   | 151 |
|     | 4.4.2 Hypersurfaces with Degenerate Gauss Maps of<br>Rank $r$ with a One-Dimensional Monge–Ampère<br>Foliation and $r$ -Multiple Foci ..... | 152 |
|     | 4.4.3 Hypersurfaces with Degenerate Gauss Maps with<br>Double Foci on Their Rectilinear Generators in the<br>Space $P^4$ .....              | 154 |
|     | 4.4.4 The Case $n = 3$ (Continuation) .....   | 164 |
| 4.5 | Reducible Varieties with Degenerate Gauss Maps .....  | 165 |
|     | 4.5.1 Some Definitions .....  | 165 |
|     | 4.5.2 The Structure of Focal Images of Reducible<br>Varieties with Degenerate Gauss Maps .....  | 165 |
|     | 4.5.3 The Structure Theorems for Reducible Varieties<br>with Degenerate Gauss Maps .....  | 166 |
| 4.6 | Embedding Theorems for Varieties with Degenerate<br>Gauss Maps .....  | 169 |
|     | 4.6.1 The Embedding Theorem .....   | 169 |
|     | 4.6.2 A Sufficient Condition for a Variety with a<br>Degenerate Gauss Map to be a Cone .....  | 172 |
|     | Notes .....   | 172 |

**Chapter 5 Further Examples and Applications of  
the Theory of Varieties with Degenerate  
Gauss Maps** 175

|     |  |     |
|-----|--|-----|
| 5.1 | Lightlike Hypersurfaces in the de Sitter Space and Their<br>Focal Properties ..... | 176 |
|     | 5.1.1 Lightlike Hypersurfaces and Physics .....                                    | 176 |
|     | 5.1.2 The de Sitter Space .....  | 177 |
|     | 5.1.3 Lightlike Hypersurfaces in the de Sitter Space .....                         | 181 |
|     | 5.1.4 Singular Points of Lightlike Hypersurfaces in the<br>de Sitter Space .....   | 184 |
|     | 5.1.5 Lightlike Hypersurfaces of Reduced Rank in the<br>de Sitter Space .....      | 192 |

|  |            |
|--|------------|
| CONTENTS   | ix         |
| 5.2 Induced Connections on Submanifolds .....  | 195        |
| 5.2.1 Congruences and Pseudocongruences in a<br>Projective Space .....   | 195        |
| 5.2.2 Normalized Varieties in a Multidimensional<br>Projective Space .....   | 198        |
| 5.2.3 Normalization of Varieties of Affine and<br>Euclidean Spaces.....  | 203        |
| 5.3 Varieties with Degenerate Gauss Maps Associated with<br>Smooth Lines on Projective Planes over<br>Two-Dimensional Algebras ..... | 207        |
| 5.3.1 Two-Dimensional Algebras and<br>Their Representations .....  | 207        |
| 5.3.2 The Projective Planes over the Algebras $\mathbb{C}, \mathbb{C}^1, \mathbb{C}^0,$<br>and $\mathbb{M}$ .....                    | 208        |
| 5.3.3 Equation of a Straight Line .....  | 209        |
| 5.3.4 Moving Frames in Projective Planes over Algebras ...   | 210        |
| 5.3.5 Focal Properties of the Congruences<br>$K, K^1,$ and $K^0$ .....   | 211        |
| 5.3.6 Smooth Lines in Projective Planes .....  | 214        |
| 5.3.7 Singular Points of Varieties Corresponding to Smooth<br>Lines in the Projective Spaces over<br>Two-Dimensional Algebras .....  | 215        |
| 5.3.8 Curvature of Smooth Lines over Algebras .....  | 217        |
| Notes .....  | 218        |
