Contents

Preface vii

0 A Brief Introduction 1

Part I Euclidean Spaces

1 Smooth Functions on a Euclidean Space 5
1.1 C^∞ Versus Analytic Functions 5
1.2 Taylor's Theorem with Remainder 7
Problems 9

2 Tangent Vectors in $\mathbb{R}^n$ as Derivations 11
2.1 The Directional Derivative 12
2.2 Germs of Functions 13
2.3 Derivations at a Point 14
2.4 Vector Fields 15
2.5 Vector Fields as Derivations 17
Problems 18

3 Alternating k-Linear Functions 19
3.1 Dual Space 19
3.2 Permutations 20
3.3 Multilinear Functions 22
3.4 Permutation Action on k-Linear Functions 23
3.5 The Symmetrizing and Alternating Operators 24
3.6 The Tensor Product 25
3.7 The Wedge Product 25
3.8 Anticommutativity of the Wedge Product 27
3.9 Associativity of the Wedge Product 28
3.10 A Basis for k-Covectors 30
Problems 31

4 Differential Forms on $\mathbb{R}^n$ 33
4.1 Differential 1-Forms and the Differential of a Function 33
4.2 Differential k-Forms 35
4.3 Differential Forms as Multilinear Functions on Vector Fields 36
4.4 The Exterior Derivative 36
4.5 Closed Forms and Exact Forms 39
4.6 Applications to Vector Calculus 39
4.7 Convention on Subscripts and Superscripts 42
Problems 42

Part II Manifolds

5 Manifolds 47
5.1 Topological Manifolds 47
5.2 Compatible Charts 48
5.3 Smooth Manifolds 50
5.4 Examples of Smooth Manifolds 51
Problems 53

6 Smooth Maps on a Manifold 57
6.1 Smooth Functions and Maps 57
6.2 Partial Derivatives 60
6.3 The Inverse Function Theorem 60
Problems 62

7 Quotients 63
7.1 The Quotient Topology 63
7.2 Continuity of a Map on a Quotient 64
7.3 Identification of a Subset to a Point 65
7.4 A Necessary Condition for a Hausdorff Quotient 65
7.5 Open Equivalence Relations 66
7.6 The Real Projective Space 68
7.7 The Standard C^∞ Atlas on a Real Projective Space 71
Problems 73

Part III The Tangent Space

8 The Tangent Space 77
8.1 The Tangent Space at a Point 77
8.2 The Differential of a Map 78
8.3 The Chain Rule 79
8.4 Bases for the Tangent Space at a Point 80
8.5 Local Expression for the Differential 82
8.6 Curves in a Manifold 83

8.7 Computing the Differential Using Curves 85
8.8 Rank, Critical and Regular Points 86
Problems 87

9 Submanifolds 91
9.1 Submanifolds 91
9.2 The Zero Set of a Function 94
9.3 The Regular Level Set Theorem 95
9.4 Examples of Regular Submanifolds 97
Problems 98

10 Categories and Functors 101
10.1 Categories 101
10.2 Functors 102
10.3 Dual Maps 103
Problems 104

11 The Rank of a Smooth Map 105
11.1 Constant Rank Theorem 106
11.2 Immersions and Submersions 107
11.3 Images of Smooth Maps 109
11.4 Smooth Maps into a Submanifold 113
11.5 The Tangent Plane to a Surface in $\mathbb{R}^3$ 115
Problems 116

12 The Tangent Bundle 119
12.1 The Topology of the Tangent Bundle 119
12.2 The Manifold Structure on the Tangent Bundle 121
12.3 Vector Bundles 121
12.4 Smooth Sections 123
12.5 Smooth Frames 125
Problems 126

13 Bump Functions and Partitions of Unity 127
13.1 C^∞ Bump Functions 127
13.2 Partitions of Unity 131
13.3 Existence of a Partition of Unity 132
Problems 134

14 Vector Fields 135
14.1 Smoothness of a Vector Field 135
14.2 Integral Curves 136
14.3 Local Flows 138
14.4 The Lie Bracket 141
14.5 Related Vector Fields 143
14.6 The Push-Forward of a Vector Field 144
Problems 144

Part IV Lie Groups and Lie Algebras

15 Lie Groups 149
15.1 Examples of Lie Groups 149
15.2 Lie Subgroups 152
15.3 The Matrix Exponential 153
15.4 The Trace of a Matrix 155
15.5 The Differential of det at the Identity 157
Problems 157

16 Lie Algebras 161
16.1 Tangent Space at the Identity of a Lie Group 161
16.2 The Tangent Space to $\mathrm{SL}(n, \mathbb{R})$ at I 161
16.3 The Tangent Space to $O(n)$ at I 162
16.4 Left-Invariant Vector Fields on a Lie Group 163
16.5 The Lie Algebra of a Lie Group 165
16.6 The Lie Bracket on $\mathfrak{gl}(n, \mathbb{R})$ 166
16.7 The Push-Forward of a Left-Invariant Vector Field 167
16.8 The Differential as a Lie Algebra Homomorphism 168
Problems 170

Part V Differential Forms

17 Differential 1-Forms 175
17.1 The Differential of a Function 175
17.2 Local Expression for a Differential 1-Form 176
17.3 The Cotangent Bundle 177
17.4 Characterization of C^∞ 1-Forms 177
17.5 Pullback of 1-forms 179
Problems 179

18 Differential k-Forms 181
18.1 Local Expression for a k-Form 182
18.2 The Bundle Point of View 183
18.3 C^∞ k-Forms 183
18.4 Pullback of k-Forms 184
18.5 The Wedge Product 184
18.6 Invariant Forms on a Lie Group 186
Problems 186

19 The Exterior Derivative 189
19.1 Exterior Derivative on a Coordinate Chart 190
19.2 Local Operators 190
19.3 Extension of a Local Form to a Global Form 191
19.4 Existence of an Exterior Differentiation 192
19.5 Uniqueness of Exterior Differentiation 192
19.6 The Restriction of a k-Form to a Submanifold 193
19.7 A Nowhere-Vanishing 1-Form on the Circle 193
19.8 Exterior Differentiation Under a Pullback 195
Problems 196

Part VI Integration

20 Orientations 201
20.1 Orientations on a Vector Space 201
20.2 Orientations and n-Covectors 203
20.3 Orientations on a Manifold 204
20.4 Orientations and Atlases 206
Problems 208

21 Manifolds with Boundary 211
21.1 Invariance of Domain 211
21.2 Manifolds with Boundary 213
21.3 The Boundary of a Manifold with Boundary 215
21.4 Tangent Vectors, Differential Forms, and Orientations 215
21.5 Boundary Orientation for Manifolds of Dimension Greater than One 216
21.6 Boundary Orientation for One-Dimensional Manifolds 218
Problems 219

22 Integration on a Manifold 221
22.1 The Riemann Integral of a Function on $\mathbb{R}^n$ 221
22.2 Integrability Conditions 223
22.3 The Integral of an n-Form on $\mathbb{R}^n$ 224
22.4 The Integral of a Differential Form on a Manifold 225
22.5 Stokes' Theorem 228
22.6 Line Integrals and Green's Theorem 230
Problems 231

Part VII De Rham Theory

23 De Rham Cohomology 235
23.1 De Rham Cohomology 235
23.2 Examples of de Rham Cohomology 237
23.3 Diffeomorphism Invariance 239
23.4 The Ring Structure on de Rham Cohomology 240
Problems 242

24 The Long Exact Sequence in Cohomology 243
24.1 Exact Sequences 243
24.2 Cohomology of Cochain Complexes 245
24.3 The Connecting Homomorphism 246
24.4 The Long Exact Sequence in Cohomology 247
Problems 248

25 The Mayer–Vietoris Sequence 249
25.1 The Mayer–Vietoris Sequence 249
25.2 The Cohomology of the Circle 253
25.3 The Euler Characteristic 254
Problems 255

26 Homotopy Invariance 257
26.1 Smooth Homotopy 257
26.2 Homotopy Type 258
26.3 Deformation Retractions 260
26.4 The Homotopy Axiom for de Rham Cohomology 261
Problems 262

27 Computation of de Rham Cohomology 263
27.1 Cohomology Vector Space of a Torus 263
27.2 The Cohomology Ring of a Torus 265
27.3 The Cohomology of a Surface of Genus g 267
Problems 271

28 Proof of Homotopy Invariance 273
28.1 Reduction to Two Sections 274
28.2 Cochain Homotopies 274
28.3 Differential Forms on $M \times \mathbb{R}$ 275
28.4 A Cochain Homotopy Between i_0^* and i_1^* 276
28.5 Verification of Cochain Homotopy 276

Part VIII Appendices

A Point-Set Topology 281
A.1 Topological Spaces 281
A.2 Subspace Topology 283
A.3 Bases 284
A.4 Second Countability 285
A.5 Separation Axioms 286
A.6 The Product Topology 287
A.7 Continuity 289
A.8 Compactness 290

A.9 Connectedness 293
A.10 Connected Components 294
A.11 Closure 295
A.12 Convergence 296
Problems 297

B The Inverse Function Theorem on $\mathbb{R}^n$ and Related Results 299
B.1 The Inverse Function Theorem 299
B.2 The Implicit Function Theorem 300
B.3 Constant Rank Theorem 303
Problems 304

C Existence of a Partition of Unity in General 307

D Linear Algebra 311
D.1 Linear Transformations 311
D.2 Quotient Vector Spaces 312

Solutions to Selected Exercises Within the Text 315

Hints and Solutions to Selected End-of-Chapter Problems 319

List of Symbols 339

References 347
