Preface to the Second Edition	ix
Preface	xi
0 Introduction	1
1 Propositional Calculus	5
§10. The Language of \mathcal{P}	5
§10A Supplement on Induction	17
§11. The Axiomatic Structure of \mathcal{P}	21
§12. Semantics, Consistency, and Completeness of \mathcal{P}	32
§13. Independence	42
§14. Propositional Connectives	44
§15. Compactness	64
§16. Ground Resolution	67
2 First-Order Logic	73
§20. The Language of \mathcal{F}	73
§21. The Axiomatic Structure of \mathcal{F}	84
§22. Prenex Normal Form	110
§23. Semantics of \mathcal{F}	114
§24. Independence	123
§25. Abstract Consistency and Completeness	125
§25A Supplement: Simplified Completeness Proof	139
§26. Equality	142
3 Provability and Refutability	151
§30. Natural Deduction	151
§31. Gentzen's Theorem	156
§32. Semantic Tableaux	160
§33. Skolemization	166
§34. Refutations of Universal Sentences	171
§35. Herbrand's Theorem	176
§36. Unification	183

4	Further Topics in First-Order Logic	189
	§40. Duality	189
	§41. Craig's Interpolation Theorem	196
	§42. Beth's Definability Theorem	199
5	Type Theory	201
	§50. Introduction	201
	§51. The Primitive Basis of \mathcal{Q}_0	210
	§52. Elementary Logic in \mathcal{Q}_0	215
	§53. Equality and Descriptions	232
	§54. Semantics of \mathcal{Q}_0	238
	§55. Completeness of \mathcal{Q}_0	248
6	Formalized Number Theory	257
	§60. Cardinal Numbers and the Axiom of Infinity	257
	§61. Peano's Postulates	261
	§62. Order	269
	§63. Minimization	276
	§64. Recursive Functions	281
	§65. Primitive Recursive Functions and Relations	289
7	Incompleteness and Undecidability	301
	§70. Gödel Numbering	303
	§71. Gödel's Incompleteness Theorems	312
	§72. Essential Incompleteness	323
	§73. Undecidability and Undefinability	332
	§74. Epilogue	338
	Supplementary Exercises	339
	Summary of Theorems	345
	Bibliography	371
	List of Figures	381
	Index	383

Index

 $\{\mathbf{F}_\alpha \mid \mathbf{A}_\alpha\}$, 231
 0_σ , 260

 abbreviation, 14
 absolutely consistent, 35

- absolutely inconsistent, 32, 35
- abstract consistency class, 130
- AC, 236
- additive abelian group, 85
- agree off, 115
- agree on, 115
- algorithm, 287
- α , 219
- α -conversion, 219, 342
- Alphabetic Change of Bound Variables, 91, 153, 156, 219, 342, 349
- and, 7
- assertion, 152
- assignment, 115, 238
- association to the left, 15
- atomic wff, 77
- axiom, 23, 84, 213, 342
- Axiom 6, 258
- Axiom of Choice, 236, 245
- axiom of infinity, 258, 266
- axiom schema, 23
- axiomatic method, 21
- axiomatic set theory, 319
- basic tautologies, 59
- β , 219
- β -contraction, 219, 342
- β -conversion, 219
- β -expansion, 219, 342
- β -normal form, 232
- β -reduction, 219
- Beth's Definability Theorem, 199
- bound, 81, 213
- bracket, 14
- but, 7
- C, 341
- c-instance, 177
- Cantor's Theorem, 254
- card, 128, 248
- cardinal number, 258
- cardinality, 128, 257, 258
- Cases, 153
- categorical, 256, 326
- characteristic function, 268
- Church's Theorem, 86
- Church's Thesis, 287, 302
- closed, 13, 67, 81, 162
- closed under subsets, 129
- cnf, 48
- compact, 67
- compactness, 64, 136, 138, 142, 253, 330
- Compactness Theorem, 64, 136, 179, 181
- complete, 51, 142, 248, 334
- completeness, 135
- Completeness Theorem, 37, 135, 158, 163, 173, 253
- composition, 285
- compound Herbrand instance, 179
- compound instance, 177
- concatenate, 11
- conjunct, 48
- conjunction, 7, 48
- Conjunction Elimination, 162, 173
- Conjunction Introduction, 156
- conjunctive normal form, 48
- connection method, 177
- consequence, 142
- conservative expansion, 127
- conservative extension, 127, 243
- Consistency Theorem, 36, 86, 243
- consistent, 35, 86, 121, 126, 136, 243, 329
- constant, 76
- contradictory, 117
- countable, 128, 248, 251
- countable model, 244

- countermodel, 117
 Craig-Lyndon Interpolation Theorem, 196
 Cut, 68, 160, 173
 Cut-Elimination, 160
 cwoff, 81, 213
- decision problem, 38, 177
 Ded, 93, 153, 349
 Deduction Theorem, 93, 349
 definable, 335
 define implicitly, 199
 DeMorgan's laws, 48
 denotation, 238
 denote, 73
 derived rules of inference, 27
 descriptions, 343
 designate, 42
 disagreement set, 185
 disjunct, 48
 disjunction, 8, 10, 48
 Disjunction Elimination, 162
 Disjunction Rules, 156, 172
 disjunctive component, 156, 172
 disjunctive normal form, 48
 disjunctively valid, 67
 dnf, 48
 domain of individuals, 80, 114
 Double-Negation Elimination, 162
 dual, 40, 192
 duality, 192
- effectively computable, 287
 elementarily equivalent, 146
 elementary theory, 85
 elementary type theory, 343
 elementary wff, 77
 elusive, 338
 equality, 142
 equality-interpretation, 146
 equality-model, 146
 equipollent, 257
 equivalence, 9
 equivalent, 9, 127
 equivalent as clauses, 68
 equivalent systems, 343
 essentially existential, 166
 essentially incomplete, 329
 essentially universal, 166
 ETPS, xiv
 exclusive disjunction, 8, 10
 existential closure, 118
 existential constant, 166
 Existential Generalization, 153, 157
 Existential Instantiation, 162
 Existential Rule, 99
 expansion, 126, 248
 expansion proof, 320
 explicit definition, 199, 290
 explicitly definable, 290
 expression, 184
 extension, 127
 extensionality, 343
 extensionally complete, 248
- F_o , 212
 \mathcal{F} , 73, 84
 $\mathcal{F}^=$, 142
 false, 117
 $Finite_{o(\alpha)}$, 260
 finite, 260
 finite character, 129
 finite intersection property, 67
 finite model, 244
 finite number, 260
 first-order theorem, 243
 first-order theory, 85
 formation rule, 11, 77
 formation sequence, 19
 formula, 11

- Four Color Theorem, 136
 fourth-order logic, 201
 frame, 238
 free, 81, 92, 152, 213
 free for, 82, 152, 213
 free on, 118
 frugal, 128, 251, 255
 full conjunctive normal form, 48
 full disjunctive normal form, 48
- Gödel's Completeness Theorem, 135, 243
 Gödel's Second Theorem, 322, 324, 369
 Gen, 84, 91
 general model, 238
 general recursive, 285
 Generalization, 84, 342
 generalize on, 84
 Gentzen's Hauptsatz, 160
 Gödel, 243, 320
 graph, 136
 Ground Resolution, 69
 ground resolvent, 68
- \mathcal{H} , 23
 η , 219
 η -contraction, 219
 η -conversion, 219
 η -expansion, 219
 η -reduction, 219
 hardware, x
 Henkin, 321
 Henkin's Completeness Theorem, 253, 362
 Henkin's Theorem, 251
 Herbrand expansion, 182
 Herbrand property, 182
 Herbrand universe, 179
 Herbrand's Theorem, 179, 356
- Hilbert, 302
 Hilbert's program, 302, 319
 Hilbert-style system, 151, 182
 horizontal path, 52
 Hyp, 91, 152, 162
 hypotheses, 24, 152
- $\iota_{(i(\alpha))}$, 211, 341
 ι , 202, 210
 identity relation, 238
 if, 8
 if and only if, 10
 iff, 10
 Implication, 8
 implies, 8
 improper symbol, 11
 inclusive disjunction, 8
 inconsistent with respect to negation, 35
 independent, 42, 123
 Indirect Proof, 104, 153, 351
 individual, 238
 individual variable, 75
 Induction on the Construction of a Wff, 12, 345
- Inf^I , 258
 Inf^{II} , 259
 Inf^{III} , 326
 infinitesimal, 138
 infix, 45
 initial function, 285
 initial object, 13
 interpolation sentence, 196
 interpretation, 114, 238
 IP, 104, 153, 351
- Kemeny, 320
- $\mathcal{L}(Q_0)$, 248
 $\mathcal{L}(\mathcal{F})$, 126
 Löb, 321

- Löb's Theorem, 322, 369
 Löwenheim's Theorem, 135
 Löwenheim-Skolem Theorem, 136
 λ , 47, 207, 211, 219, 238
 λ -conversion, 219
 λ -notation, 279
 language, 126, 248
 least-number operator, 279
 length of proof, 243
 less specified, 184
 liar paradox, 313
 linear ordering, 66
 literal, 48, 125
 logistic system, 24
- material implication, 8
 mating method, 177
 matrix, 111
 meaning, 115
 meta-language, 11
 metatheorem, 11
 method of horizontal paths, 57
 method of vertical paths, 57, 58
 minimization, 279
 model, 117, 121, 136, 238
 Modus Ponens, 23, 84, 86, 342
 Modus Tollens, 86
 monotonic, 25
 more general, 184
 MP, 23, 84, 91
- $N_{o\sigma}$, 260
 nand, 44
 natural deduction, 152
 natural number, 17
 necessary, 8, 10
 Neg., 153
 negation, 7
 Negation Elimination, 173
 Negation Introduction, 156
 negation normal form, 51, 177
 negation normal formula, 51
 negation normal sentence, 177
 negative, 196
 negatively, 111
 nnf, 51, 177
 nns, 177
 Non-equivalence, 10
 nonmonotonic, 26
 nonstandard, 254, 255
 nonstandard analysis, 138
 nonstandard model, 138
 nonstandard number theory, 138
 nor, 44
 not, 7
 nth-order arithmetic, 320
 null formula, 152
 numeral, 266
 numerical function, 278
 numerical relation, 279
- o , 202, 210
 object language, 11
 only if, 8
 operation, 13
 or, 8
- $\Pi_{o(\alpha)}$, 212
 \mathcal{P} , 5
 parable, 312
 paradox, 136, 313, 322
 partial ordering, 66
 partial recursive, 285
 PCI, 18
 Peano's Postulates, 258, 261, 266
 Peirce's dagger, 44
 PMI, 17
 poset, 66
 positive, 196
 positively, 111
