## Contents

<b>1 Introduction to Optical Coherence Tomography</b>	
<i>J. Fujimoto and W. Drexler</i> .....	1
1.1 Introduction .....	1
1.2 OCT and Other Imaging Technologies .....	2
1.3 Measuring Optical Echoes .....	5
1.3.1 Photographing Light in Flight .....	5
1.3.2 Femtosecond Time Domain Measurement .....	6
1.3.3 Low-Coherence Interferometry .....	7
1.4 Early OCT Imaging .....	9
1.5 Early OCT Technology and Systems .....	13
1.5.1 Ophthalmic OCT Imaging .....	15
1.5.2 Catheter and Endoscopic OCT Imaging .....	19
1.6 Advances in Image Resolution .....	23
1.6.1 Factors Governing Resolution and Depth of Field .....	23
1.6.2 Light Sources for Ultrahigh Resolution OCT .....	26
1.7 Advances in Imaging Speed .....	30
1.7.1 Spectral/Fourier Domain Detection .....	31
1.7.2 Swept Source/Fourier Domain Detection .....	35
1.8 Conclusion .....	38
References .....	40
<b>2 Theory of Optical Coherence Tomography</b>	
<i>J.A. Izatt and M.A. Choma</i> .....	47
2.1 Introduction .....	47
2.2 Confocal Gating and Lateral Resolution in OCT Systems .....	49
2.3 Axial Ranging with Low-Coherence Interferometry .....	51
2.4 Fourier Domain Low Coherence Interferometry .....	56
2.5 Time Domain Low Coherence Interferometry .....	59
2.6 Practical Aspects of FDOCT Signal Processing .....	60
2.6.1 Sensitivity Falloff and Sampling Effects in FDOCT .....	60
2.6.2 Artifact Removal in FDOCT by Phase Shifting .....	63

2.7	Sensitivity and Dynamic Range in OCT Systems . . . . .	66
2.7.1	SNR Analysis for Time-Domain OCT . . . . .	66
2.7.2	SNR Analysis for Fourier-Domain OCT . . . . .	68
	References . . . . .	72

**3 Modeling Light–Tissue Interaction  
in Optical Coherence Tomography Systems**

*P.E. Andersen, T.M. Jørgensen, L. Thrane, A. Tycho,  
and H.T. Yura . . . . .* 73

3.1	Introduction . . . . .	73
3.1.1	Modeling Light–Tissue Interactions Relevant to OCT . .	74
3.1.2	Organization of this Chapter . . . . .	76
3.2	Analytical OCT Model Based on the Extended Huygens–Fresnel Principle . . . . .	77
3.2.1	The Extended Huygens–Fresnel Principle . . . . .	77
3.2.2	Calculating the OCT Signal: Time-Domain . . . . .	78
3.3	Doppler OCT Analysis . . . . .	89
3.3.1	Multiple Scattering Effects in ODT . . . . .	89
3.4	Advanced Monte Carlo Simulation of OCT Systems . . . . .	92
3.4.1	Theoretical Considerations . . . . .	93
3.4.2	Monte Carlo Simulation of the OCT Signal . . . . .	96
3.4.3	Validation . . . . .	98
3.5	Applications of Modeling in OCT . . . . .	102
3.5.1	Extracting Optical Scattering Properties from a MC-Simulated Heterogeneous Multilayered Sample . . . . .	103
3.5.2	Extraction of Optical Scattering Properties from Tissues . . . . .	105
3.6	Summary . . . . .	107
	Appendix . . . . .	108
	References . . . . .	113

---

**Part I Optical Coherence Tomography Technology**

---

**4 Inverse Scattering, Dispersion, and Speckle  
in Optical Coherence Tomography**

*A.F. Fercher . . . . .* 119

4.1	Inverse Scattering and Backscattering . . . . .	119
4.1.1	Inversion of Forward and Backward Scattering Data . .	119
4.1.2	Use of Backscattered Field Data in PCI and OCT . . . .	122
4.1.3	Measurement of Amplitudes and Phases in ODT, Fourier PCI, and OCT . . . . .	124
4.2	Dispersion in OCT . . . . .	129
4.2.1	Impact of Sample Dispersion on the Low Coherence Interferogram Signal . . . . .	129
4.2.2	Dispersion Compensation in OCT . . . . .	132

4.2.3	Refractometric OCT .....	136
4.3	Speckle in OCT .....	137
4.3.1	OCT Speckle .....	137
4.3.2	Speckle as Information Carrier .....	140
4.3.3	Suppression of Speckle in OCT .....	141
	References .....	144

**5 Spectral/Fourier Domain Optical Coherence Tomography**

	<i>J.F. de Boer</i> .....	147
5.1	Introduction .....	147
5.2	Introduction to Signal to Noise .....	147
5.2.1	Noise Analysis of SD-OCT Using Charge-Coupled Devices (CCDs) .....	148
5.3	Autocorrelation Noise: Dynamic Range and Digitization Depth .....	150
5.3.1	Bit Resolution and Well Depth of the CCD, Dynamic Range, and Sensitivity .....	151
5.4	Experimental Demonstration of SNR Advantage .....	152
5.4.1	Shot-Noise-Limited Detection .....	154
5.5	Remapping to $k$ -Space; Sensitivity Drop Off as a Function of Depth; Spectrometer Resolution, Fixed Pattern Noise Removal .....	155
5.6	Dispersion Compensation .....	158
5.6.1	Fixed Pattern Noise Removal .....	161
5.6.2	Postprocessing .....	163
5.6.3	Depth-Dependent Sensitivity .....	163
5.7	Motion Artifacts and Fringe Washout .....	166
5.7.1	The Effect of Pulsed Illumination on RIN Noise .....	168
5.7.2	Phase Stability and Doppler .....	169
5.8	Retinal Imaging with SD-OCT .....	171
5.9	Conclusion .....	173
	References .....	173

**6 Complex and Coherence Noise Free Fourier Domain Optical Coherence Tomography**

	<i>R.A. Leitgeb and M. Wojtkowski</i> .....	177
6.1	Introduction .....	177
6.2	Complex OCT Signal .....	178
6.2.1	Phase Noise .....	181
6.2.2	Fringe Wash-Out .....	184
6.2.3	Phase Sensitive Detection .....	185
6.3	Coherence Noise-Free Imaging with Fourier Domain OCT .....	190
6.3.1	Coherence Noise Terms .....	190
6.3.2	Background Subtraction .....	191

6.3.3	Physical Separation of the Coherence Noise Terms . . . . .	192
6.3.4	Optical Power Optimization . . . . .	193
6.3.5	Differential FdOCT Technique . . . . .	196
6.4	Complex Fourier Domain Optical Coherence Tomography . . . . .	197
6.4.1	Phase Shifting Techniques: $N$ -frames . . . . .	199
6.4.2	Ghosts Cleaning Algorithms . . . . .	200
6.4.3	Complex Two-Frame Technique . . . . .	200
6.4.4	Heterodyne Fourier Domain OCT Techniques . . . . .	203
6.5	Summary . . . . .	205
	References . . . . .	205

**7 Optical Frequency Domain Imaging**

	<i>B.E. Bouma, G.J. Tearney, B.J. Vakoc, and S.H. Yun</i> . . . . .	209
7.1	Introduction . . . . .	209
7.2	Principles of Operation . . . . .	210
7.2.1	Frequency Domain Signal . . . . .	210
7.2.2	Detection Sensitivity . . . . .	211
7.3	Instrumentation . . . . .	214
7.3.1	Light Source and Interferometer . . . . .	214
7.3.2	Sampling and Data Processing . . . . .	216
7.4	Motion Artifacts . . . . .	217
7.4.1	Axial Motion . . . . .	218
7.4.2	Transverse Motion . . . . .	220
7.4.3	Nonlinear Tuning Slope . . . . .	222
7.5	Phase-Sensitive (Doppler) OFDI . . . . .	223
7.6	Applications . . . . .	232
7.6.1	Gastrointestinal Tract Imaging <i>In Vivo</i> . . . . .	232
7.6.2	Intracoronary Imaging <i>In Vivo</i> . . . . .	234
7.6.3	Four-Dimensional Imaging of an Embryo Heart . . . . .	235
	References . . . . .	236

**8 Ultrahigh Resolution Optical Coherence Tomography**

	<i>W. Drexler, Y. Chen, A. Aguirre, B. Považay, A. Unterhuber, and J.G. Fujimoto</i> . . . . .	239
8.1	Longitudinal and Transverse Resolution in OCT . . . . .	239
8.2	Axial Resolution Limits for OCT . . . . .	242
8.2.1	Group Velocity Dispersion Limitations to Resolution . . . . .	242
8.2.2	Dispersion and Resolution in FD OCT . . . . .	246
8.2.3	Spectral Shape of Ultrabroad Bandwidth Light Sources . . . . .	247
8.2.4	Chromatic Aberration Limitations to Resolution . . . . .	248
8.2.5	Other Limitations to Resolution . . . . .	248
8.3	Ultrahigh Resolution OCT at 800 nm . . . . .	250
8.4	Ultrahigh Resolution OCT at 1,300 nm . . . . .	263
8.5	Ultrahigh Resolution OCT at 1,050 nm . . . . .	270
8.6	Ultrahigh Resolution OCT in the Visible Wavelength Region . . . . .	271

8.7	Conclusion .....	274
	References .....	276
<b>9 Superluminescent Diode Light Sources for OCT</b>		
	<i>V.R. Shidlovski</i> .....	281
9.1	Main Principles of SLD Operation and SLD Spectrum Broadening .....	282
9.2	Reported SLD Performance Parameters .....	287
	9.2.1 AlGaInP SLDs at 680 nm .....	287
	9.2.2 AlGaAs SLDs at 780–870 nm Band .....	287
	9.2.3 InGaAs SLDs at 920–1060 nm Spectral Band .....	287
	9.2.4 InGaAsP/InP SLDs at 1300–1600 nm Spectral Band ...	289
9.3	SLD Based Broadband and Powerful Lightsources .....	291
9.4	SLDs and Optical Feedback. Important Aspects of SLDs Use in Practice .....	294
9.5	Conclusions .....	297
	References .....	298
<b>10 Broad Bandwidth Laser and Nonlinear Optical Light Sources for OCT</b>		
	<i>A. Unterhuber, B. Považay, A. Aguirre, Y. Chen, F.X. Kärtner, J.G. Fujimoto, and W. Drexler</i> .....	301
10.1	Solid-State Lasers .....	302
	10.1.1 Transition-Metal-Doped Materials .....	303
	10.1.2 Femtosecond Lasers .....	304
	10.1.3 Mode Locking .....	305
	10.1.4 Resonator Design .....	306
10.2	Ti:Sapphire Laser Development .....	311
	10.2.1 Mirror Technology for Femtosecond Pulse Ti:Sapphire Lasers .....	312
	10.2.2 Ultrabroad Bandwidth Ti:Sapphire .....	315
	10.2.3 Low Pump-Power Broad Bandwidth Laser Sources .....	322
10.3	Cr <sup>3+</sup> :LiCAF Laser Development .....	329
10.4	Cr <sup>4+</sup> /Forsterite Laser Development .....	331
10.5	Cr <sup>4+</sup> :YAG Laser Development .....	334
10.6	Supercontinuum Light Source Development .....	336
	10.6.1 Microstructured Fibers .....	336
	10.6.2 Spectral Broadening in the Visible .....	342
	10.6.3 Simultaneous Spectral Broadening in the Visible and NIR .....	343
	10.6.4 Spectral Broadening in the NIR .....	347
10.7	Conclusion .....	352
	References .....	355

**11 Wavelength Swept Lasers**

<i>S.H. Yun and B.E. Bouma</i> .....	359
11.1 Introduction .....	359
11.2 General Requirements .....	360
11.3 Fundamentals .....	363
11.3.1 Gain Medium .....	364
11.3.2 Semiconductor Optical Amplifier (SOA) .....	364
11.3.3 Laser Cavity .....	365
11.3.4 Tunable Laser .....	366
11.3.5 Sweep Operation .....	367
11.4 Techniques .....	369
11.4.1 Scanning Filters .....	369
11.4.2 Resonant Sweep .....	371
11.4.3 Sliding Frequency Mode-Locking .....	374
11.4.4 Stretched Chirped Pulses .....	374
11.4.5 Wavelength Conversion .....	375
11.5 Outlook .....	376
References .....	377

**12 Optical Design for OCT**

<i>Z. Hu and A.M. Rollins</i> .....	379
12.1 Optical Design Considerations for OCT .....	379
12.1.1 Unique Optical Design Needs for OCT .....	379
12.1.2 Sample Scanners .....	380
12.1.3 Scanning ODLs .....	382
12.1.4 Spectrometers .....	383
12.2 Some Key Optical Design Principles for OCT .....	384
12.2.1 Telecentric Optics .....	384
12.2.2 Aspheric Optics .....	384
12.2.3 Achromatic Optics .....	386
12.3 Scanning ODL Design Example .....	387
12.4 OCT Scanner Design Examples .....	393
12.4.1 Overview of OCT Scanners .....	393
12.4.2 Design Example: Bench-Top Scanner .....	393
12.4.3 Design Example: Catheter Probe .....	397
12.5 FD-OCT Spectrometer Design Example .....	400
12.5.1 Achromatic Spectral Response .....	400
12.5.2 Optical Resolution and Detector Array Resolution .....	401
References .....	404

**13 Data Analysis and Signal Postprocessing for Optical Coherence Tomography**

<i>D.L. Marks, T.S. Ralston, and S.A. Boppart</i> .....	405
13.1 Introduction .....	405
13.2 Signal Improvement by Averaging or Compounding .....	407

13.3	Deconvolution and Spectral Shaping . . . . .	409
13.4	Speckle Reduction . . . . .	411
13.5	Dispersion Correction . . . . .	413
13.6	Refraction Correction . . . . .	415
13.7	Image Representation and Coloring . . . . .	417
13.8	Synthetic Aperture Imaging for Microscopy . . . . .	419
13.9	Conclusions . . . . .	423

**Part II En Face Optical Coherence Tomography  
and Optical Coherence Microscopy**

---

**14 Linear OCT**

	<i>G. Hüttmann, P. Koch, and R. Birngruber . . . . .</i>	429
14.1	Introduction . . . . .	429
14.2	Theory . . . . .	430
	14.2.1 The Principle of Linear OCT . . . . .	430
	14.2.2 Optical Control of the Carrier Frequency . . . . .	432
	14.2.3 Sensitivity and Signal-to-Noise Ratio . . . . .	435
14.3	Detectors for Linear OCT . . . . .	436
	14.3.1 Systematical Errors and Detector Noise . . . . .	437
	14.3.2 Spatial Resolution and MTF . . . . .	438
	14.3.3 Practical Considerations and Choice of the Detector . . . . .	439
	14.3.4 Signal Processing . . . . .	440
14.4	Examples of L-OCT Systems . . . . .	441
14.5	Conclusion . . . . .	444
	References . . . . .	444

**15 En-Face Flying Spot OCT/Ophthalmoscope**

	<i>R.B. Rosen, P. Garcia, A.Gh. Podoleanu, R. Cucu, G. Dobre, M.E.J. van Velthoven, M.D. de Smet, J.A. Rogers, M. Hathaway, J. Pedro, and R. Weitz . . . . .</i>	447
15.1	Introduction . . . . .	447
15.2	Different Scanning Procedures . . . . .	447
	15.2.1 Flying Spot En-Face (T-Scan) OCT . . . . .	447
	15.2.2 A-Scan-Based B-Scan . . . . .	447
	15.2.3 T-Scan-Based B-Scan . . . . .	448
	15.2.4 C-Scan . . . . .	449
15.3	Simultaneous En-Face OCT and Confocal Imaging . . . . .	449
	15.3.1 OCT/SLO . . . . .	450
	15.3.2 En-Face Scanning Allows High Transversal Resolution . . . . .	451
	15.3.3 Synergy Between the Channels . . . . .	452
	15.3.4 3D Imaging . . . . .	453

15.3.5	Topography .....	454
15.3.6	New Challenges .....	454
15.3.7	Clinical Use of the OCT/Ophthalmoscope: Pattern Recognition .....	456
15.3.8	En-Face Ultrahigh-Resolution OCT .....	460
15.4	Simultaneous OCT and Fluorescence Angiography of the Retina .....	463
15.5	Anterior Segment En-Face OCT .....	469
15.6	Conclusions .....	472
	References .....	473

## 16 Acousto Optic Modulator Based En Face OCT

	<i>C.K. Hitzenberger and M. Pircher</i> .....	475
16.1	Introduction .....	475
16.2	Carrier Frequency Generation by Acousto Optic Frequency Shifting .....	476
16.3	Interferometer Setups and Scanning Scheme .....	477
16.4	Dynamic Focusing .....	480
16.5	Polarization Sensitive TS-OCT .....	481
16.5.1	Interferometric Setup .....	482
16.5.2	Extraction of Amplitude and Phase .....	483
16.5.3	Calculation of Polarization Parameters .....	484
16.6	Results and Discussion I: Intensity Based Imaging .....	484
16.6.1	High Speed 3D OCT of the Retina .....	484
16.6.2	High-Resolution Imaging of Human Photoreceptor Mosaic .....	485
16.6.3	Dynamic Focus Imaging of the Human Optic Nerve Head .....	488
16.6.4	Imaging in Materials Sciences .....	490
16.7	Results and Discussion II: Polarization Sensitive Imaging .....	494
16.7.1	PS-OCT Imaging of Human Skin .....	494
16.7.2	PS-OCT Imaging of Human Anterior Eye Segment .....	496
16.7.3	PS-OCT Imaging of Human Retina .....	498
	References .....	501

## 17 Optical Coherence Microscopy

	<i>A.D. Aguirre and J.G. Fujimoto</i> .....	505
17.1	Introduction .....	505
17.2	Confocal Microscopy .....	506
17.3	High Transverse Resolution in Optical Coherence Tomography ..	508
17.3.1	Depth Priority Techniques .....	509
17.3.2	Transverse Priority and <i>En Face</i> Imaging .....	512
17.3.3	<i>En Face</i> Imaging in the Time and Fourier Domain .....	512
17.4	Heterodyne Signal Detection in OCM .....	514
17.5	Advantages of OCM .....	517

17.6 Technology for OCM ..... 522  
 17.6.1 Broadband Light Sources ..... 523  
 17.6.2 Modulation Schemes ..... 524  
 17.6.3 Microscope Scanner Designs ..... 527  
 17.6.4 Controlling the Overlap of Coherence  
 and Confocal Gating ..... 530  
 17.6.5 Combination Microscopy Techniques ..... 532  
 17.7 Cellular Imaging Applications of OCM ..... 532  
 17.8 Summary and Future Prospects ..... 537  
 References ..... 538

**18 Combined MPM/OCT System  
 and Second Harmonic OCT**

*Z. Chen and S. Tang* ..... 543  
 18.1 Introduction ..... 543  
 18.2 Combined MPM/OCT System ..... 544  
 18.2.1 Principles of MPM/OCT ..... 545  
 18.2.2 Applications of the Combined MPM/OCT System ..... 551  
 18.3 Second Harmonic OCT ..... 554  
 18.3.1 Time-Domain SH-OCT ..... 556  
 18.3.2 Fourier-Domain SH-OCT ..... 558  
 18.4 Summary ..... 561  
 References ..... 561

**19 Full-Field Optical Coherence Tomography**

*A. Dubois and A.C. Boccara* ..... 565  
 19.1 Introduction ..... 565  
 19.2 The Full-Field OCT Technique ..... 566  
 19.2.1 Experimental Arrangement ..... 566  
 19.2.2 Principle of Operation ..... 567  
 19.2.3 Image Processing and Display ..... 569  
 19.3 Performances of Full-Field OCT ..... 569  
 19.3.1 Transverse Resolution ..... 569  
 19.3.2 Axial Resolution ..... 570  
 19.3.3 Detection Sensitivity ..... 571  
 19.3.4 Advantages and Drawbacks of Parallel Acquisition ..... 573  
 19.4 A Tool for Noninvasive Histology ..... 574  
 19.4.1 Applications in Embryology and Developmental  
 Biology ..... 574  
 19.4.2 Applications in Ophthalmology ..... 576  
 19.5 Spectroscopic Full-Field OCT ..... 577  
 19.5.1 Introduction ..... 577  
 19.5.2 Experimental Setup ..... 578  
 19.5.3 Intensity-Based Imaging Mode ..... 578  
 19.5.4 Spectroscopic Information Extraction ..... 579

19.5.5	Spectroscopic Biomedical Imaging . . . . .	579
19.6	Full-Field OCT in the 1.2- $\mu\text{m}$ Wavelength Region . . . . .	580
19.6.1	Increasing the Wavelength for Deeper Penetration . . . . .	580
19.6.2	Imaging Without Immersion Medium . . . . .	581
19.6.3	Performances . . . . .	582
19.7	Ultra-Fast Full-Field OCT . . . . .	584
19.7.1	Experimental Setup . . . . .	584
19.7.2	The Highest Speed Ever Achieved in OCT . . . . .	586
19.8	Conclusion . . . . .	587
	References . . . . .	588

## 20 Holographic Optical Coherence Imaging

	<i>D.D. Nolte, K. Jeong, P.M.W. French, and J. Turek</i> . . . . .	593
20.1	Introduction . . . . .	593
20.2	Development and Applications of Holographic OCI . . . . .	594
20.3	System Architecture and Performance . . . . .	596
20.3.1	Speckle Holography and Spatial Heterodyne . . . . .	596
20.3.2	Photorefractive Quantum Well Devices and Films . . . . .	597
20.3.3	Image-Domain vs. Spatial Fourier-Domain OCI . . . . .	599
20.4	Multicellular Tumor Spheroids . . . . .	601
20.4.1	Growth and Uses of Tumor Spheroids . . . . .	601
20.4.2	Optical Properties of Tumor Spheroids . . . . .	602
20.5	Optical Coherence Imaging of Tumor Spheroids . . . . .	604
20.6	Functional Imaging . . . . .	610
	References . . . . .	615

## Part III Optical Coherence Tomography Extensions

---

### 21 Doppler Optical Coherence Tomography

	<i>Z. Chen and J. Zhang</i> . . . . .	621
21.1	Introduction . . . . .	621
21.2	Principles of Doppler OCT . . . . .	623
21.2.1	Time Domain Doppler OCT Based on Spectrogram Method . . . . .	627
21.2.2	Phase-Resolved Doppler OCT Method . . . . .	628
21.2.3	Fourier Domain Phase-Resolved Doppler OCT Method . . . . .	631
21.2.4	Transverse Flow Velocity and Doppler Angle Determination . . . . .	634
21.2.5	Quantification of Three-Dimensional Velocity Vector . . . . .	635
21.3	Applications of Doppler OCT . . . . .	638
21.3.1	Drug Screening . . . . .	638
21.3.2	<i>In Vivo</i> Blood Flow Monitoring During Photodynamic Therapy (PDT) . . . . .	639

21.3.3	Imaging Brain Hemodynamics . . . . .	640
21.3.4	<i>In Vivo</i> Monitoring of the Efficacy of Laser Treatment of Port Wine Stains . . . . .	641
21.3.5	<i>In Vivo</i> Imaging and Quantification of Ocular Blood Flow . . . . .	642
21.3.6	Three-Dimensional Images of a Microvascular Network . . . . .	643
21.3.7	Imaging and Quantification of Flow Dynamics in MEMS Microchannel . . . . .	644
21.4	Summary . . . . .	648
	References . . . . .	649

**22 Polarization-Sensitive Optical Coherence Tomography**

	<i>B.H. Park and J.F. de Boer</i> . . . . .	653
22.1	Theory . . . . .	653
	22.1.1 Jones Formalism I . . . . .	656
	22.1.2 Mueller–Stokes Formalism . . . . .	661
	22.1.3 Jones Formalism II . . . . .	674
22.2	Applications . . . . .	680
22.3	Future Directions . . . . .	687
	References . . . . .	691

**23 Using Low Coherent Light  
for Spectroscopic Information from Tissue**

	<i>D.J. Faber, M.C.G. Aalders, B. Hermann, W. Drexler, and T.G. van Leeuwen</i> . . . . .	697
23.1	Introduction . . . . .	697
23.2	Theory . . . . .	697
	23.2.1 The OCT Signal . . . . .	698
	23.2.2 Localized Spectroscopic Information . . . . .	700
	23.2.3 Optical Properties of Tissues . . . . .	702
	23.2.4 Accuracy of SOCT . . . . .	704
23.3	Applications . . . . .	705
	23.3.1 Contrast Enhancement . . . . .	705
	23.3.2 Functional SOCT . . . . .	708

## Part IV Optical Coherence Tomography Applications

---

### 29 Optical Coherence Tomography in Tissue Engineering

	<i>S.A. Boppart, Y. Yang, and R.K. Wang</i> . . . . .	889
29.1	Introduction to Tissue Engineering . . . . .	889
	29.1.1 Cells . . . . .	890
	29.1.2 Scaffold . . . . .	891
	29.1.3 Bioreactor (Culture Environment) . . . . .	891
29.2	Current Imaging and Monitoring Techniques . . . . .	892
	29.2.1 Light Microscopy and Histology . . . . .	892
	29.2.2 Confocal and Two-Photon Microscopy . . . . .	893
	29.2.3 Micro-Computed Tomography . . . . .	894
29.3	OCT as an Investigative Tool for Tissue Engineering . . . . .	894
	29.3.1 Technological Aspects Relevant to Tissue Engineering . . . . .	895
	29.3.2 Scaffold and Substrate . . . . .	898
	29.3.3 Cell Growth Profiles . . . . .	899
	29.3.4 Single Cell Identification and Differentiation . . . . .	903
	29.3.5 Imaging Under Static and Dynamic Growth Conditions . . . . .	907
	29.3.6 Dynamic Cellular Processes . . . . .	908
29.4	Integrated Imaging Methods . . . . .	912
29.5	Summary . . . . .	915
	References . . . . .	915

### 30 OCT Applications in Developmental Biology

	<i>A.M. Davis, S.A. Boppart, F. Rothenberg, and J.A. Izatt</i> . . . . .	919
30.1	Introduction . . . . .	919
30.2	Animal Models . . . . .	919
30.3	Other Imaging Technologies . . . . .	920
30.4	OCT Imaging Technology Considerations . . . . .	922
	30.4.1 OCT System Requirements for Developmental Biology Studies . . . . .	922
	30.4.2 OCT System Design for Small Animal Imaging . . . . .	925
	30.4.3 Doppler Imaging . . . . .	927
	30.4.4 Birefringence Imaging . . . . .	930
	30.4.5 Molecular Contrast Imaging . . . . .	932

30.4.6	Elastography .....	935
30.5	OCT Applications in Developmental Biology .....	936
30.5.1	<i>Drosophila</i> .....	937
30.5.2	<i>Xenopus laevis</i> (African Frog).....	939
30.5.3	Zebrafish .....	942
30.5.4	Medaka .....	944
30.5.5	Chicken Embryo .....	946
30.5.6	Mouse .....	951
30.6	Future Directions .....	955
30.7	Summary .....	955
	References .....	956

**31 Anterior Eye Imaging with Optical Coherence Tomography**

	<i>D. Huang, Y. Li, and M. Tang</i> .....	961
31.1	Background .....	961
31.1.1	Evolution of OCT Imaging in the Eye.....	961
31.1.2	The Development of Corneal and Anterior Segment OCT Technology .....	961
31.1.3	Commercial Anterior Segment OCT .....	964
31.2	Diagnostic and Surgical Applications .....	965
31.2.1	Mapping of Corneal Thickness .....	965
31.2.2	Measuring Corneal Refractive Power .....	967
31.2.3	LASIK Anatomy .....	968
31.2.4	Corneal Surgery .....	971
31.2.5	Assessment of Angle Closure Glaucoma .....	974
31.2.6	Anterior Chamber Biometric and Intraocular Lens Implants .....	976
31.3	Future Developments .....	977
	References .....	979

**32 Retinal Optical Coherence Tomography**

	<i>W. Drexler and J.G. Fujimoto</i> .....	983
32.1	Two-Dimensional UHR OCT vs. Histology: Improved Interpretation of Intraretinal Layers .....	986
32.2	Two-Dimensional, Clinical UHR OCT .....	993
32.3	High Speed, UHR OCT: Three-Dimensional and High Definition OCT .....	993
32.4	Three-Dimensional, Clinical UHR OCT .....	1001
32.5	UHR OCT in Animal Models.....	1006
32.6	Quantitative Analysis Using Three-Dimensional UHR OCT .....	1011
32.7	Alternative Wavelength Regions for Retinal OCT .....	1019
32.8	Adaptive Optics UHR OCT .....	1027
32.9	Optophysiology: Depth-Resolved Retinal Physiology .....	1032
32.10	Conclusion .....	1037
	References .....	1040

**33 Optical Coherence Tomography**

**for Gastrointestinal Endoscopy**

*X. Qi, M.V. Sivak Jr., and A.M. Rollins* . . . . . 1047

33.1 Brief Review of Gastroenterology and Endoscopy . . . . . 1047

33.2 Brief Review of EOCT Technology Development . . . . . 1052

    33.2.1 Catheters (Scanners) . . . . . 1052

    33.2.2 Real-Time OCT . . . . . 1056

    33.2.3 Signal and Image Processing . . . . . 1058

    33.2.4 Other Techniques . . . . . 1060

33.3 EOCT Studies to Date . . . . . 1061

    33.3.1 Practical Aspects of EOCT . . . . . 1061

    33.3.2 *Ex Vivo* Studies . . . . . 1063

    33.3.3 Clinical Trials . . . . . 1065

    33.3.4 Clinical Applications . . . . . 1068

    33.3.5 Barrett's Esophagus . . . . . 1069

    33.3.6 Blood Flow Analysis . . . . . 1073

    33.3.7 Pancreas and Biliary Tract . . . . . 1074

    33.3.8 Colon . . . . . 1076

33.4 Future Directions . . . . . 1076

References . . . . . 1077

**34 Imaging Coronary Atherosclerosis and Vulnerable Plaques with Optical Coherence Tomography**

*G.J. Tearney, I.-K. Jang, and B.E. Bouma* . . . . . 1083

34.1 Introduction . . . . . 1083

34.2 Optical Coherence Tomography . . . . . 1084

34.3 Optical Coherence Tomography System . . . . . 1084

34.4 *Ex Vivo* Studies . . . . . 1085

    34.4.1 Plaque Characterization . . . . . 1085

34.5 Clinical Studies . . . . . 1090

34.6 Current Technology Challenges . . . . . 1093

34.7 Future Outlook: Fourier Domain OCT . . . . . 1094

34.8 Optical Frequency Domain Imaging . . . . . 1094

34.9 Conclusion . . . . . 1095

References . . . . . 1097

**35 OCT in Dermatology**

*J. Welzel, E. Lankenau, G. Hüttmann, and R. Birngruber* . . . . . 1103

35.1 Technical Demands for a Skin OCT-System . . . . . 1103

    35.1.1 Introduction (OCT-Systems in Dermatology) . . . . . 1103

    35.1.2 Medical Applicators . . . . . 1106

    35.1.3 Quantification of Tissue Parameters . . . . . 1107

    35.1.4 Image Processing . . . . . 1110

    35.1.5 Field of View and Measurement Artifacts . . . . . 1111

35.1.6	Functional OCT Techniques for Tissue Characterization .....	1113
35.2	Application of OCT in Dermatology .....	1113
35.2.1	Diagnosis of Skin Diseases .....	1114
35.2.2	Evaluation of Treatment Effects .....	1117
35.3	Comparison with Other Skin Imaging Methods .....	1119
35.3.1	High-Resolution Ultrasound .....	1119
35.3.2	Confocal Laser Microscopy .....	1120
35.4	Conclusion and Outlook .....	1120
	References .....	1121
<b>36 OCT in Laryngology</b>

**40 Optical Coherence Tomography in Urology**

*E.V. Zagaynova, N.D. Gladkova, O.S. Streltsova, G.V. Gelikonov,  
N. Tresser, F.I. Feldchtein, M.J. Manyak, and N.M. Shakhova* . . . . . 1241

40.1 Introduction . . . . . 1241

40.2 OCT Applications for Benign Conditions of the Bladder . . . . . 1243

    40.2.1 Normal Bladder . . . . . 1243

    40.2.2 Bladder Diverticulum . . . . . 1244

    40.2.3 Acute Cystitis . . . . . 1244

    40.2.4 Chronic Cystitis . . . . . 1245

    40.2.5 Follicular Cystitis . . . . . 1246

    40.2.6 Radiation Cystitis . . . . . 1246

    40.2.7 Urothelial Atrophy . . . . . 1246

    40.2.8 Simple Urothelial Hyperplasia . . . . . 1247

    40.2.9 von Brunn’s Nests . . . . . 1247

    40.2.10 Cystitis Cystica . . . . . 1248

    40.2.11 Squamous Metaplasia . . . . . 1248

40.3 OCT Applications to Diagnostics and Treatment  
of Bladder Cancer . . . . . 1249

    40.3.1 OCT Images of Malignant Conditions of the Bladder . . . 1250

    40.3.2 OCT Accuracy in Detection of Bladder Cancer  
        in Flat Suspicious Zones . . . . . 1251

    40.3.3 OCT-Guided Surgery of the Bladder Cancer . . . . . 1255

    40.3.4 OCT as an Adjunct to Fluorescence Cystoscopy . . . . . 1256

40.4 OCT for Other Applications in Urology . . . . . 1261

    40.4.1 Prostate Cancer . . . . . 1261

    40.4.2 Retroperitoneal OCT Images . . . . . 1262

40.5 Conclusion: Clinical Application of the OCT  
in Urology Today and Tomorrow. Can OCT Increase  
the Percentage of the Organ-Preserving Treatment? ..... 1265  
References ..... 1266

**41 Anatomical Optical Coherence Tomography  
of the Human Upper Airway**

*J.J. Armstrong, M.S. Leigh, J.H. Walsh, D.R. Hillman,  
P.R. Eastwood, and D.D. Sampson* ..... 1269

41.1 Introduction ..... 1269

41.2 System Description ..... 1271

    41.2.1 Long-Range Delay Line ..... 1273

    41.2.2 Modeling ..... 1274

41.3 Basic *a*OCT Validation Studies ..... 1276

41.4 *In Vivo* Studies ..... 1277

    41.4.1 Pullback Scans ..... 1277

    41.4.2 Comparison of *a*OCT and CT ..... 1279

    41.4.3 Reproducibility of *a*OCT Scans ..... 1280

41.5 Clinical Measurements ..... 1280

    41.5.1 Data Presentation ..... 1281

    41.5.2 Measuring Pharyngeal Compliance ..... 1281

    41.5.3 *a*OCT Scanning During Sleep ..... 1283

    41.5.4 Response of Airway Shape to Mandible  
and Tongue Position ..... 1284

41.6 Further Data Processing ..... 1285

    41.6.1 Contour Extraction ..... 1286

    41.6.2 Three-Dimensional Reconstruction ..... 1287

41.7 Discussion and Conclusions ..... 1288
